In addition the issue of sustainable development will be described and explained in the course of this term paper, as it is strongly connected with environmental destruction. The author's view is on the whole rather economic than operational, although he gives at the end an example of a company which has successfully integrated ecology in economy. Not considered are environmental measures of individuals like saving energy and avoiding waste in their households as well as the potential of ecological innovations in industries. In fact this work rather wants to explain in why it is nowadays absolutely necessary to integrate ecology in economy by describing the negative consequences for a company as well as for nature respectively for the whole globe by not doing so. 20 pp. Englisch.
