Reviews

*Here is the best pdf i actually have go through till now. We have study and i also am certain that i am going to planning to go through once again once more in the future. You will not sense monotony at at any time of the time (that's what catalogs are for regarding in the event you question me).

ALGEBRAIC CURVES

To get **Algebraic Curves** PDF, please refer to the link beneath and download the ebook or gain access to other information that are relevant to ALGEBRAIC CURVES ebook.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This book was written to furnish a starting point for the study of algebraic geometry. The topics presented and methods of presenting them were chosen with the following ideas in mind; to keep the treatment as elementary as possible, to introduce some of the recently developed algebraic methods of handling problems of algebraic geometry, to show how these methods are related to the older analytic and geometric methods, and to apply the general methods to specific geometric problems. These criteria led to a selection of topics from the theory of curves, centering around birational transformations and linear series. Experience in teaching the material showed the need of an introduction to the underlying algebra and projective geometry, so this is supplied in the first two chapters. The inclusion of this material makes the book almost entirely self-contained. Methods of presentation, proof of theorems, and problems, have been adapted from various sources. We should mention, in particular, Severi-Laffier, Vorlesungen über Algebraische Geometrie, van der Waerden, Algebraische Geometrie and Moderne Algebra, and lecture notes of S. Lefschetz and O. Zariski. We also wish to thank Mr. R. L. Beinert and Prof. G. L. Walker for suggestions and assistance with the proof, and particularly Prof. Saunders MacLane for a very careful examination and criticism of an early version of the work. R. J. WALKER Cornell University December 1, 1949

Contents Preface . | 'l. Algebraic Preliminaries.- 1. Set Theory.- Sets.- Single valued transformations.- Equivalence classes.- 2. Integral Domains and Fields.- Algebraic systems.- Integral domains.- Fields.- Homomorphisms of domains.- Exercises.- 3. Quotient Fields.- 4. Linear Dependence and Linear Equations.- Linear dependence.- Linear equations.- 5. Polynomials.- Polynomial domains.- The division transformation.- Exercise.- 6. Factorization in Polynomial Domains.- Factorization in domains.- Unique factorization of polynomials.- Exercises.-...
